PROFESSIONAL SUMMARY

Analytical and detail-oriented Data Analyst with an MBA in International Business and over 4 years of enterprise experience analyzing high-volume transactional and operational datasets. Proven background in the payments and e-commerce space, specializing in MIS reporting, trend identification, anomaly detection, and data cleansing using SQL, Python, Advanced Excel, and Power BI. Experienced in building interactive dashboards, presenting key performance trends to management, and partnering cross-functionally to drive operational improvements and data accuracy.

TECHNICAL SKILLS & CORE COMPETENCIES

- Querying & Databases: SQL (Multi-table Joins, Subqueries, CTEs, Window Functions, Aggregations, GROUP BY, HAVING, Relational Schema Design)
- Programming & Statistical Analysis: Python (Pandas, NumPy, Data Cleaning, Exploratory Data Analysis, Statistical Summaries)
- MIS Reporting & Visualization: Power BI (Interactive Dashboards, DAX, KPI Tracking), Advanced Excel (Power Query, Pivot Tables, XLOOKUP, VLOOKUP, SUMIFS, Slicers, Trend Reports)
- Data Operations & Business Analysis: Data Preprocessing, Trend & Pattern Identification, Anomaly Detection, Discrepancy Resolution, Process Improvement, Stakeholder Presentation, SLA Management

PROFESSIONAL EXPERIENCE

Senior Resolution Coordinator - Fraud Operations | Walmart

Chennai, India | May 2025 – Jul 2026

- Analyzed high-volume transactional records, payment datasets, and user account patterns to detect operational anomalies, policy misuse, and irregular financial behavior.
- Tracked, analyzed, and delivered operational MIS reports on core KPIs (First Response Time and Resolution Rate), consistently exceeding organizational SLA benchmarks through data-driven ticket prioritization.
- Collaborated cross-functionally with Payments, Logistics, and Seller Support teams to translate complex transactional discrepancies into plain-language findings and actionable resolutions.
- Maintained strict data consistency, accuracy, and audit-ready records across sensitive transactional logs in accordance with company governance standards.

Scheduling Analyst | Straive

Puducherry, India | Feb 2022 – Apr 2025

- Evaluated operational performance datasets and workflows using Advanced Excel tracking models, reducing baseline error rates by 25%.
- Automated and streamlined recurring operational and MIS reports, boosting delivery accuracy by 20% and reducing report turnaround cycles by 10%.
- Prepared weekly MIS performance reports and data summaries, presenting key operational findings and trends directly to team leads and leadership stakeholders to drive SOP adherence.
- Identified operational bottlenecks through variance analysis, recommending process adjustments that stabilized workflow performance.

DATA ANALYTICS & VISUALIZATION PROJECTS

Data Analytics Program

- Formulated structured SQL queries utilizing multi-table JOINS, GROUP BY, HAVING, and subqueries to extract, aggregate, and analyze high-volume datasets for business insights.
- Engineered dynamic, interactive dashboards in Power BI and Advanced Excel using calculated fields, pivot tables, and slicers to visualize performance trends and track KPIs.
- Conducted Exploratory Data Analysis (EDA) using Python (Pandas, NumPy) to cleanse messy datasets, rectify null/missing values, and compute statistical summaries for reporting.

Relational Database Design & Schema Modeling

- Employee Management System (SQL): Designed relational schemas with primary and foreign keys; authored optimized queries to analyze departmental staffing metrics and compensation trends.
- Hospital Management System (SQL): Modeled relational tables across patient admissions, scheduling, and billing records to ensure referential integrity for reporting.

EDUCATION

Master of Business Administration (MBA) in International Business | Pondicherry University | CGPA: 8.5/10 (2021)

Bachelor of Commerce (B.Com) | Indhira Gandhi College of Arts and Science | Aggregate: 67% (2019)

ADDITIONAL INFORMATION

- Languages: English (Fluent), Tamil (Native), German (Basic)
- Target Location: Chennai / Puducherry (Open to In-Office in Chennai)
