

## KANAKASABHAPATHI M.

Puducherry, India | +91 9789634802 | Kanakasabhpathi.m@gmail.com |  
[linkedin.com/in/kanakasabhpathi-m-b2b43117](https://www.linkedin.com/in/kanakasabhpathi-m-b2b43117)

### PROFESSIONAL SUMMARY

Data Analyst and MBA graduate with 4+ years of enterprise experience analyzing high-volume operational and transactional datasets. Skilled in SQL (PostgreSQL), Advanced Excel, Power BI, and Python to extract clean data, automate MIS reports, track KPIs, and detect anomalies. Proven track record of improving data accuracy, reducing error rates by 25%, and delivering actionable insights for cross-functional decision-making.

### TECHNICAL SKILLS

- Querying & Databases: PostgreSQL, SQL (Joins, Subqueries, CTEs, Aggregations, GROUP BY, Indexing, EXPLAIN Optimization, Relational Schema Design)
- BI & Visualisation: Power BI (KPI Cards, DAX Measures, Interactive Dashboards), Advanced Excel (Power Query, Pivot Tables, Lookups, SUMIFS, Slicers)
- Analytics & Tools: Python (Pandas, NumPy, Matplotlib for EDA & Visualization), MIS Reporting, Data Validation, Root-Cause Analysis, SLA Management

### PROFESSIONAL EXPERIENCE

Senior Resolution Coordinator - Fraud Operations | Walmart

Chennai, India | May 2025 – Jul 2026

- Analyzed high-volume transactional records and user account behavior datasets to detect anomalies, policy misuse, and irregular activity.
- Tracked operational KPIs including First Response Time and Resolution Rate, consistently exceeding SLA targets through data-driven ticket prioritization.
- Partnered cross-functionally with Payments, Logistics, and Seller Support teams to resolve data discrepancies and improve operational workflow efficiency.
- Maintained strict data consistency, accuracy, and audit-ready documentation across sensitive transactional logs per company standards.

## Scheduling Analyst | Straive

Puducherry, India | Feb 2022 – Apr 2025

- Evaluated operational workflows and structural datasets using Advanced Excel tracking models, reducing operational error rates by 25%.
- Streamlined scheduled reporting pipelines, improving overall data delivery accuracy by 20% and cutting turnaround times by 10%.
- Produced weekly performance and quality reports, presenting data insights to leadership to drive SOP adherence and process stability.
- Conducted root-cause analysis on workflow discrepancies and instituted data validation checks to prevent recurring errors.

## DATA ANALYTICS PROJECTS

- E-Commerce Sales Analysis (Python): Cleaned sales data using Pandas and NumPy, identified product trends, and generated visual charts with Matplotlib.
- Hospital Analytics System (PostgreSQL): Modeled relational tables for patient and revenue data; utilized indexing and EXPLAIN plans to optimize query performance.
- Employee Analytics Dashboard (Power BI): Built dynamic dashboards with custom DAX measures and KPI cards to analyze salary and workforce distribution.
- Sales MIS & Data Reporting (Excel): Automated reporting models using XLOOKUP, VLOOKUP, SUMIFS, Pivot Tables, and validation rules to remove duplicates.
- Employee Management System (SQL): Designed normalized relational schemas with primary and foreign keys to track departmental staffing metrics.

## EDUCATION

- Master of Business Administration (MBA) in International Business | Pondicherry University | CGPA: 8.5/10 (2021)
- Bachelor of Commerce (B.Com) | Indhira Gandhi College of Arts and Science | Aggregate: 67% (2019)
